Office Action Summary	Application No. 10/828,804	Applicant(s) SPRINGER ET AL.	
	Examiner Devon C. Kramer	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

- 1) Claims 2-3, 8 and 10 remain withdrawn.

Claim Rejections - 35 USC § 103

- 2) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 3) Claims 1, 4-7, 9 and 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carroll et al (20020017805) in view of Hall (3554527).

Carroll teaches an energy absorbing pad with elements (18, 20, 22).

In re claims 1, 4, 7, 9, 11-14 and 17-20, Hall provides an energy absorbing padding capable of use in a motor vehicle comprising: a first base layer (34, figure 4) having a planar first face, a planar second face, and a plurality of integrally formed first elements each having a first surface of rotation defining an enclosed first hollow interior (38); and a second base layer (32) having the same properties as the first base layer.

IN re claims 5-6, 15-16, Hall provides the second face of the first base layer is attached to the first face of the second base layer. Please note that bonding is read as being affixed because bonding can be considered a process.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the padding of Carroll with elements like that of Hall merely to provide an element which is capable of absorbing a great amount of energy and is efficient.

Response to Arguments

4) Applicant's arguments with respect to claims 1, 4-7, 9 and 11-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Workman, Jensen, Johnson and Matsushita all provide energy absorbing elements.

6) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C. Kramer whose telephone number is 571-272-7118. The examiner can normally be reached on Mon-Fri 8-4.
